Chorus Box Cracked Accounts generates a chorus effect to your audio signal with a little boost and a little twist. If you need a subtle or a more aggressive sound, Chorus Box Cracked Accounts is the right choice. The square wave and the random waveforms is very useful if you have a really nice sound but want to bring more life to the final output. The Saw wave is perfect for the purpose as well. The output of the generator is a square wave with a higher pitch, not sharp, just a nice effect that will surely give you some life to your sound. You have three different ways to adjust the Chorus effect. The pitch slide is the classic way to adjust the pitch effect, by sliding the pitch control. The random and the square wave control is used to give the effect a little twist as well as to give the sound some more randomness. The random wave is more sensitive to the settings but also more chaotic. The square wave is less sensitive and more stable at the same time. The delays for the square, random and saw wave are adjustable, as well as the gain, cut and overall volume. Chorus Box Crack + PC/Windows

This soft chorus has an addition phasing effect to the classic chorus. It sounds like a reverb, but with a soft touch. You can also use this effect on vocals or other instruments with a low harmonic content. It is a great tool to use when you feel that some reverb could sound a bit weak, but you don't want to add an overly heavy chorus just for that. By using this effect you can make a professional sounding chorus without having to rely on harsh echo. ● Chorus Width - Frequency range: 20-20,000 Hz - Depth: +/- 2.5v - EQ: • Rolloff: 1dB: 10kHz • Q: 0.1 ● Arp: - Input: MIDI or SysEx - Oscillator: • Amplitude: ± 16.8v • Frequency: 8.75Hz-16,750Hz • Phase: Random - Output: • Oscillator: LFO • Amplitude: ± 16.8v • Frequency: 32Hz - Input: • Frequency: 100-200 Hz - Amplitude: +/– 0.5v • Phase: Linear - Output: • Frequency: 100-200 Hz - Amplitude: +/– 0.5v • Phase: Linear - Input: • Frequency: 200-500 Hz - Amplitude: +/– 0.5v - Phase: Linear - Output: • Frequency: 200-500 Hz - Amplitude: +/– 0.5v - Phase: Linear ● Input: • Frequency: 500-1000 Hz - Amplitude: +/– 0.5v - Phase: Linear - Output: • Frequency: 500-1000 Hz - Amplitude: +/– 0.5v - Phase: Linear ● Input: • Frequency: > 1000 Hz - Amplitude: +/– 0.5v - Phase: Linear - Output: • Frequency: > 1000 Hz - Amplitude: +/– 0.5v - Phase: Linear ● Input: • Frequency: Random - Amplitude: +/– 0.5v - Phase: Linear - Output: • Frequency: Random - Amplitude: +/– 0.5v - Phase: Linear - Input: • Frequency: Sawtooth - Amplitude: ± 16.8v - Phase: Linear b7e8fdf5c8
